

CHILDREN'S MUSEUM
OF SCIENCE + TECHNOLOGY

Summer 2020 Field Trip Activities

Amazing Animals: Visit CMOST and meet some members of our living collection up close. You will learn about some of the animals that live at CMOST and even get to touch them, if you want to!

Come Play With Us! This fun summer program will explore toys from the old classics to some of the toys you play with today. Is there science in toys? We will investigate the answer and then create a bouncy ball to take home.

Clever Coding: We are surrounded by technology, but do you know how it works? Computers and cell phones speak in a special machine language called code. We will explore basic code and develop an understanding of how it works by playing games and doing hands on activities.
